Brainstorm & Idea Prioritization Template

Date	22 July 2026
Team ID	TEAM-HT-2026
Project Name	Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

🕒 10 minutes to prepare
🕒 1 hour to collaborate
👤 2-8 people recommended

➔

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

A **Team gathering**
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

B **Set the goal**
Think about the problem you'll be focusing on solving in the brainstorming session.

C **Learn how to use the facilitation tools**
Use the Facilitation Superpowers to run a happy and productive session.

1

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

PROBLEM

How might we [your problem statement]?

Key rules of brainstorming

To run a smooth and productive session

- Stay in topic.
- Defer judgment.
- Go for volume.
- Encourage wild ideas.
- Listen to others.
- If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

🕒 10 minutes

TIP
You can select a sticky note and hit the pencil icon to switch to sketch icon to start drawing!

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

🕒 20 minutes

Person 4

TIP
Add customizable tags to sticky notes to make it easier to find, remove, organize, and categorize important ideas as themes within your mural.

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

Our Brainstorming Session – Heritage Treasures Project

Step-1: Team Gathering & Problem Statement Selected — The team met and agreed to address PS-1: helping analysts and policy makers quickly identify heritage-site distribution and at-risk sites, and PS-2: surfacing regional inscription trends over time, using the UNESCO World Heritage Sites (2019) dataset in Tableau.

Step-2: Brainstormed Ideas (Listed & Grouped)

Visualization Ideas

- Treemap of heritage sites by country, sized by number of sites (Country, Name_en)
- Pie chart of sites 'In Danger' vs 'Not in Danger' (Danger, Name_en)
- Line chart of new inscriptions per year, segmented by Region (Date_inscribed, Region)
- Map view plotting sites by latitude/longitude with category color-coding
- Bar chart ranking top 10 countries by site count

Dashboard & Story Ideas

- Single responsive dashboard combining the treemap, pie chart and trend line with cross-filtering
- Multi-scene story: Overview → At-Risk Sites → Regional Trends → Key Takeaways
- Filter panel for Region, Category (Cultural/Natural/Mixed) and Year range

Technical Implementation Ideas

- Clean and pre-process the raw CSV (handle nulls, standardize country/region names)
- Create calculated fields: Site Count, Danger Flag, Years Since Inscription, Region Rank
- Publish workbook to Tableau Public/Server and embed dashboard + story in a Flask web app

Step-3: Idea Prioritization

Idea	Impact	Feasibility	Priority
Treemap of sites by country	High	High	1 – Must Have
Pie chart of sites in danger	High	High	1 – Must Have
Line chart of regional inscription trends	High	Medium	1 – Must Have
Interactive filter panel (Region/Category/Year)	Medium	High	2 – Should Have
Multi-scene guided story	Medium	Medium	2 – Should Have
Map view with lat/long plotting	Medium	Medium	3 – Nice to Have
Flask web app embedding	High	Medium	2 – Should Have
