

Project Demonstration

Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau

Date	22 July 2026
Team ID	TEAM-HT-2026
Project Name	Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau
Team Lead	Devendra Reddy
Team Member	DHARA MAHITHA

1. Demo Video

A short walkthrough of the Heritage Treasures dashboard and story, showing:

- The country-wise treemap and how site counts vary by country
- The In Danger vs Not in Danger pie chart
- The regional inscription trend line and how it responds to the Year filter
- Navigating the guided story (Overview → At-Risk Sites → Regional Trends → Takeaways)
- The dashboard running inside the Flask-embedded web page

Demo Video Link: [Team Lead to add – e.g. YouTube / Google Drive / Loom link]

2. GitHub Repository

Source code for the Flask web app, data cleaning scripts, and the Tableau workbook.

Repository Link: [Team Lead to add – e.g. <https://github.com/<org>/heritage-treasures>]

Suggested repository structure:

Path	Contents
data/	Raw and cleaned UNESCO World Heritage Sites CSV files
notebooks/ or scripts/	Python/Pandas data cleaning and calculated-field prep scripts
workbook/	Tableau .twbx workbook (dashboard + story)
app.py	Flask application entry point and routes
templates/	HTML pages embedding the Tableau dashboard/story
static/	CSS, JS, and image assets for the Flask app

requirements.txt	Python dependencies (Flask, Pandas, etc.)
README.md	Setup instructions and project overview

3. How to Run the Demo Locally

1. Clone the repository: `git clone [repository link]`
2. Install dependencies: `pip install -r requirements.txt --break-system-packages`
3. Ensure the cleaned dataset is in the `data/` folder (or run the cleaning script first)
4. Set the `TABLEAU_EMBED_URL` environment variable to the published Tableau Server/Public link
5. Start the Flask app: `python app.py`
6. Open `http://127.0.0.1:5000` in a browser to view the embedded dashboard and story

4. Published Tableau Workbook

Tableau Public / Server Link: [*Team Lead to add – the published dashboard + story link*]

5. Notes

This document was prepared ahead of the team lead adding the final demo video and GitHub/Tableau links to the project board, per the note: "Request Team Lead to Add Demo and GitHub links!" Once those links are available, replace the bracketed placeholders above with the live links so the mentor can review and evaluate the project.
